

**WIRELESS  
ANTIBACTERIAL  
FLAT MEDICAL  
KEYBOARD**

## Prevent Cross Infections by upgrading to the SterileFLAT Wireless Antibacterial Medical Keyboard

SterileFLAT Keyboards are an invaluable tool in reducing the risk of cross infection in any medical environment. Shared keyboards on the wards or other clinical environments can become breeding grounds for Healthcare associated infections (HAI). Infections that are acquired in hospitals or as a result of healthcare interventions.

SterileFlat Keyboards offer a conventional style keyboard with RoHS Compliancy and a Nano Silver impregnated Antibacterial Silicone latex free membrane barrier which can be used in all areas of clinical and medical environments.

They can be regularly washed with a recognised antibacterial or alcohol based cleaning agent every day, thus reducing the spread of MRSA, Cdif, Noro Virus, E Coli, Salmonella and Airborne Viruses. Find out more at [www.sterileflat.com](http://www.sterileflat.com)

### Key features/benefits of the SterileFLAT Keyboard:

- Totally Flat Keyboard surface that's quick and easy to wipe and sterilise
- Can be cleaned with Antibacterial and Alcohol based agents or Chlor-clean a chlorine based agent as used in many Hospitals.
- Underside of keyboard has a lightweight easy clean cover for added antibacterial protection.
- Keyboard face Antibacterial. The membrane combines active Nano Silver technology with a flexible but strong latex free silicon barrier cover.
- Tooled custom fit silicon latex free membrane.
- Replacement Membranes readily available.
- CE and FCC Approved, RoHS Compliant keyboard.
- Soft touch tactile keys.
- Can be supplied without or without Antibacterial silicon coated optical or laser mouse.
- USB port for dongle
- 2.4G wireless system
- Keyboard uses 2x AAA batteries
- Compatible with Microsoft Windows98/Me/2000/NT/XP/Windows 7

## QUICK GUIDE

SterileFLAT Keyboards have a totally flat surface that's quick & easy to sterilise, with a soft tactile feel. CE, FCC Approved and RoHS compliant.

- **Flat keyboard design** quickly wipes clean with Antibacterial and Alcohol based agents or Chlor-clean a chlorine based agent as used in many Hospitals.
- **No nooks and crannies** between keys for bacteria to hide. Helps to reduce keyboard cross-contamination.
- **Keyboard face Antibacterial**  
The membrane combines active Nano Silver technology with a flexible but strong silicon barrier cover.
- **Underside of keyboard** has a lightweight easy clean cover for added antibacterial protection.
- **Very Cost effective**
- Can be supplied with or without Antibacterial silicon coated optical or laser mouse.
- **SterileFLAT Keyboards** promotes good hospital hygiene practices.
- **Dimensions:** (L x W x H) 400 x 130 x 22mm
- **104-keys with:** 10 million key operations
